World Cancer Day

Date: 04/02/2022

Activity: Poster Making

On 04 February, 2022 Shah Satnam Ji College of Education celebrated World

Cancer Day as observed by the World Summit Against Cancer, held at Paris

in 2000. World Cancer Day is a global initiative led by Union for International

Cancer Control (UICC) to face one of our greatest challenges. World Cancer

Day theme for 2022 was "Close the Care Gap", recognizing the inequities in

cancer care around the globe. UICC is fully committed towards reducing cancer

mortality and increase awareness about lifestyle behaviors responsible for

cancer.

On that occasion poster making competition was organized by "Literary and Art

Club" of the college to spread awareness among students. The objective of this

competition was to make students aware about this fatal disease and the removal

of misconceptions about it. Pupil-Teachers of D.El.Ed., B.Ed. and M.Ed.

participated in this competition. The young learners displayed their thoughts

about cancer awareness through their posters. The poster made by pupil-

teachers showcased the causes of cancer like tobacco, alcohol consumption,

unhealthy life style and internal infections etc.
